A Sonova brand

¹ Thibodeau, L. (2014). Comparison of speech recognition with adaptive digital and FM wireless technology by listeners who use hearing aids. American Journal of Audiology, 23(2), 201-210.

PartnerMic

The remote microphone with its optimized design and performance can be easily attached to the clothing of a conversation partner so their voice can be transmitted directly to your hearing aids. It has excellent sound quality and battery performance. The PartnerMic² is a real asset, especially in acoustically challenging situations.

Roger™ Microphones

You can benefit from the proven performance of Roger technology in noise and over distance¹, streaming directly to your hearing aids. Roger microphones have the ability to distinguish the direction of incoming speech and give the flexibility to focus on conversations. From classrooms to the office, to spending time with friends, you can feel more comfortable in many listening situations with the help of Roger technology.

röger

Remote Control

The Remote Control² is ergonomic, handy, and easy to use. The large, clearly-labeled buttons make it very easy to adjust the volume or program on your hearing aids.

TV Connector

The TV Connector² makes it easy to send the audio from TVs and other audio devices, such as stereo systems, directly to your hearing aids. Multiple people can enjoy top-rated sound quality and watch TV or listen to music from up to 15 meters away from the TV Connector.
