

HearIntelligence™.

Better hearing. Better living.

HearIntelligence™ supports your natural hearing. It was developed by HANSATON to enhance natural functions and processes in human hearing.

SOUND OPTIMIZATION

People with non-impaired hearing can ignore disturbing noise and concentrate instead on the important sounds they want to hear.

HearIntelligence™ technology supports your hearing by processing incoming sounds and reducing them to essential components that are either boosted or suppressed, providing an optimized hearing experience.

Innovative by tradition:

Since the inception of HANSATON in 1957, we have been developing innovative and aesthetically sophisticated hearing solutions to offer you more freedom and emotion.

hansaton.com

We drive the transition to a resource-efficient and low-carbon future of our operations throughout the lifecycle of our products and services.
